1. The amendment filed 04/30/2004 has been entered.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claim 35 the second occurrences of "a" in the phrases "to measure a a first intensity" and "to measure a a second intensity" have been deleted. This amendment will remove the spelling errors in the claim.

***Allowable Subject Matter***

3. Claims 1, 11, 13-22, 31, 33-39 are allowed.
4. The following is an examiner's statement of reasons for allowance: Claims 1, 11, 13-22, 31, 33, 34 are allowable for reasons as indicated in detail in the previous Office Action. The amendment to claims 35-39 to more clearly define the invention, namely that the two radiation sensors positioned in the fluid are disposed substantially parallel to each other with respect to a direction of the fluid flow, render the claims allowable over the prior art cited where the two sensors are positioned perpendicular to each other.

Art Unit: 2878

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. **NOTE:** References Hamilton (US 2001/0046461 A1) and its foreign counterpart Hamilton (EP 1130381 A1) disclose the same apparatus and method for fluid transmission detection as the present invention but due to their application and filing dates they cannot be used to reject the claims.
